# Antistatic

Antistatic footwear prevents build-up of static electrical charges and ensures that they are discharged effectively. Volume resistance between 100 KiloOhm and 1 GigaOhm

# Breathable upper

Increased moisture and temperature management for extended wearer comfort.

#### Electrical hazard (EH)

Electrical hazard (EH) rated safety shoes have nonconductive outsoles. As a secondary source of protection they reduce the potential for electric shocks under dry conditions.

#### **Heel energy absorption**

Heel energy absorption reduces the impact of jumps or running on the body of the wearer.

#### **Composite toecap**

Metalfree and lightweight, no thermal or electrical conductivity

### Metal free

Metal free safety shoes are in general lighter than regular safety shoes. They are also very beneficial for professionals who have to pass through metal detectors several times a day.

#### **Industries:**

Automotive, Cleaning, Construction, Logistics, Mining, Oil & Gas, Industry

#### **Environments:**

Dry environment, Uneven surfaces

## **Maintenance instructions:**

To extend the life of your shoes, we recommend to clean them regularly and to protect them with adequate products. Do not dry your shoes on a radiator, nor nearby a heat source.
