a. Abrasion resistance: based on the number of cycles required to rub through the sample glove.
b. Cut resistance: based on the number of cycles required to cut through the sample at a constant speed with a rotating blade.
c. Tear resistance: based on the amount of force required to tear the sample.
d. Puncture resistance: based on the amount of force required to pierce the sample with a standard sized point.
e. Cut resistance according TDM100 test based on the number of cycles required to cut through the sample at a constant speed with a sliding blade.

ESD
ESD provides the controlled discharge of electrostatic energy that can damage electronic components and avoids risks of ignition resulting from electrostatic charges. Volume resistance less than 100 megaohms (Rv < 1.0 x 10^8 Ω).

Excellent dexterity
These gloves are made from one of the thinnest knitted fabrics available and offer excellent dexterity, comfort, and protection.

All-round protection
These gloves offer great all-round protection, keeping your hands safe in many different environments.

DMF-free PU
Made from polyurethane that doesn't contain DMF (a chemical that can be harmful), which means they are safe to use.

Touchscreen compatible
You can use your smartphone or tablet without taking off the gloves, thanks to their special coating.

Latex free
These gloves have extra padding to protect your palms and knuckles from impacts, reducing the risk of injury.
