BLK

Heat insulated (HI)

Heat insulated (HI) safety footwear is usually worn in hot temperature environments. It limits the increase of temperature inside the shoe.

Heat resistant outsole (HRO)

The outsole resists high temperatures up to 300°C.

Breathable leather upper

Natural leather provides a high degree of wearer comfort combined with durability in versatile applications.

Metal free

Metal free safety shoes are in general lighter than regular safety shoes. They are also very beneficial for professionals who have to pass through metal detectors several times a day.

Electrostatic Discharge (ESD)

ESD provides the controlled discharge of electrostatic energy that can damage electronic components and avoids risks of ignition resulting from electrostatic charges. Volume resistance between 100 KiloOhm and 100 MegaOhm.

Nano carbon toecap

Ultralight high-tech material, metalfree with no thermal or electrical conductivity.
